

BIS Standards — Pinecone Prototype Dataset

A structured, PDF-based prototype dataset containing concise explanations and retrieval-oriented metadata for selected Indian Standards.

Purpose: Use this document to test PDF parsing → chunking → Sentence Transformer embeddings → Pinecone semantic retrieval.

Important: This is a research/prototype summary dataset. It is not a replacement for the official BIS standards and does not reproduce their full text. Always verify applicability and current editions against BIS before making compliance decisions.

Standard	Domain	Category
IS 10322 (Part 1):2026	Electrical / Lighting	Luminaires
IS 10322 (Part 5/Sec 3):2026	Electrical / Outdoor Lighting	Road and Street Lighting
IS 10322 (Part 5/Sec 5):2026	Electrical / Outdoor Lighting	Floodlights
IS 10322 (Part 5/Sec 8):2026	Electrical / Emergency Lighting	Emergency Lighting
IS 302 (Part 1):2024	Electrical Appliances	Appliance Safety
IS 694:2010	Electrical / Cables	Power Cables
IS 456:2000	Civil Engineering / Construction	Concrete
IS 800:2007	Civil Engineering / Structural Engineering	Structural Steel
IS 875 (Part 1):2026	Civil Engineering / Structural Design	Design Loads

IS 10322 (Part 1):2026

Title: Luminaires — Part 1: General Requirements and Tests

Domain: Electrical / Lighting

Category: Luminaires

Explanation

This standard provides general requirements and tests for luminaires. It is relevant when a procurement specification concerns the general construction, safety, performance-related testing, and marking of lighting equipment.

Scope

General requirements and tests applicable to luminaires.

Retrieval Keywords

luminaire, lighting, LED, construction, safety, marking, testing, electrical lighting

Typical Tender Requirements to Extract

Check the luminaire type, construction, electrical characteristics, applicable safety provisions, marking and required tests.

Related Standards / Relationships

IS 10322 Part 5 series; particular requirements for specific luminaire applications.

Source: BIS LIMS / BIS official standard information

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 10322 (Part 5/Sec 3):2026

Title: Luminaires — Part 5: Particular Requirements — Section 3: Luminaires for Road and Street Lighting

Domain: Electrical / Outdoor Lighting

Category: Road and Street Lighting

Explanation

This standard addresses particular requirements for luminaires intended for road and street lighting. It is relevant to tenders specifying outdoor roadway or street-lighting luminaires.

Scope

Particular requirements for luminaires used for road and street lighting.

Retrieval Keywords

street light, road lighting, outdoor luminaire, LED street light, roadway, lighting

Typical Tender Requirements to Extract

Identify the application as road/street lighting and verify that the proposed luminaire satisfies the applicable particular requirements in addition to general luminaire requirements.

Related Standards / Relationships

IS 10322 Part 1; other IS 10322 Part 5 sections depending on application.

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 10322 (Part 5/Sec 5):2026

Title: Luminaires — Part 5: Particular Requirements — Section 5: Floodlights

Domain: Electrical / Outdoor Lighting

Category: Floodlights

Explanation

This standard covers particular requirements for floodlights. It is useful for procurement specifications involving high-intensity outdoor or area-lighting equipment.

Scope

Particular requirements for floodlights.

Retrieval Keywords

floodlight, flood light, outdoor lighting, area lighting, LED floodlight, luminaire

Typical Tender Requirements to Extract

Match the tender's product type to floodlight use and evaluate the particular requirements together with the applicable general luminaire requirements.

Related Standards / Relationships

IS 10322 Part 1; other lighting application standards where applicable.

Source: BIS official laboratory/test-report listing

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 10322 (Part 5/Sec 8):2026

Title: Luminaires — Part 5: Particular Requirements — Section 8: Luminaires for Emergency Lighting

Domain: Electrical / Emergency Lighting

Category: Emergency Lighting

Explanation

This standard provides particular requirements for luminaires intended for emergency lighting. It is relevant to tenders specifying emergency or backup lighting installations.

Scope

Particular requirements for luminaires for emergency lighting.

Retrieval Keywords

emergency lighting, emergency luminaire, backup light, exit lighting, LED emergency light

Typical Tender Requirements to Extract

Identify emergency-lighting use and check the applicable particular requirements together with the general luminaire requirements.

Related Standards / Relationships

IS 10322 Part 1; emergency-lighting application requirements.

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 302 (Part 1):2024

Title: Household and Similar Electrical Appliances — Safety — Part 1: General Requirements

Domain: Electrical Appliances

Category: Appliance Safety

Explanation

This standard specifies general safety requirements for household and similar electrical appliances. It is relevant to procurement of electrical appliances where protection against electrical, mechanical, thermal, fire and related hazards is important.

Scope

General safety requirements for household and similar electrical appliances, subject to the scope and limitations of the standard.

Retrieval Keywords

electrical appliance, household appliance, appliance safety, electric shock, thermal safety, fire safety

Typical Tender Requirements to Extract

Identify the appliance type, rated voltage and intended application, then check the relevant general safety requirements and applicable particular requirements.

Related Standards / Relationships

IS 302 Part 2 sections for specific appliance categories.

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 694:2010

Title: Polyvinyl Chloride Insulated Unsheathed and Sheathed Cables/Cords with Rigid and Flexible Conductor for Rated Voltages up to and Including 1100 V

Domain: Electrical / Cables

Category: Power Cables

Explanation

This standard covers PVC-insulated cables and cords with rigid or flexible conductors. It is relevant to electrical procurement specifications involving PVC-insulated power and lighting cables.

Scope

PVC-insulated unsheathed and sheathed cables/cords with rigid and flexible conductors within the specified voltage range and applicable construction types.

Retrieval Keywords

PVC cable, electrical cable, power cable, flexible cable, conductor, 450/750 V, 1100 V, insulation

Typical Tender Requirements to Extract

Check conductor material/type, cable construction, rated voltage, insulation and sheath requirements, and applicable tests.

Related Standards / Relationships

IS 8130 for conductors; IS 5831 for PVC insulation and sheath.

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 456:2000

Title: Plain and Reinforced Concrete — Code of Practice

Domain: Civil Engineering / Construction

Category: Concrete

Explanation

This code covers the general structural use of plain and reinforced concrete. It is relevant to tenders involving structural concrete work, concrete materials, mix proportioning, durability, workability and strength-related requirements.

Scope

General structural use of plain and reinforced concrete; special structures may require additional standards.

Retrieval Keywords

concrete, reinforced concrete, RCC, structural concrete, compressive strength, durability, mix design

Typical Tender Requirements to Extract

Extract concrete grade, material requirements, mix proportioning, workability, durability and strength/testing requirements from the tender.

Related Standards / Relationships

IS 269, IS 383, IS 432 and other referenced concrete/material standards.

Source: BIS official preview / BIS LIMS

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 800:2007

Title: General Construction in Steel — Code of Practice

Domain: Civil Engineering / Structural Engineering

Category: Structural Steel

Explanation

This code provides general requirements for the design and construction of steel structures. It is relevant to procurement and construction specifications involving structural steel members and steel-framed structures.

Scope

General construction in steel and associated design/construction provisions within the scope of the code.

Retrieval Keywords

structural steel, steel structure, steel members, construction, fabrication, design

Typical Tender Requirements to Extract

Identify structural steel grade, member types, connection/fabrication requirements and applicable design/construction provisions.

Related Standards / Relationships

IS 2062 for hot rolled structural steel; IS 875 series for design loads where applicable.

Source: BIS official Standard Details

Pinecone metadata suggestion: standard_id, title, domain, category, keywords, source, page_number.

IS 875 (Part 1):2026

Title: Design Loads Other than Earthquake for Buildings and Structures — Part 1: Dead Loads — Unit Weights of Building Construction and Stored Materials

Domain: Civil Engineering / Structural Design

Category: Design Loads

Explanation

This standard addresses dead loads for buildings and structures, including unit weights of building construction and stored materials. It can be relevant when tender specifications require structural load calculations or material unit-weight assumptions.

Scope

Dead loads and unit weights of building construction and stored materials within the scope of the standard.

Retrieval Keywords

dead load, unit weight, structural design, building loads, construction materials, stored materials

Typical Tender Requirements to Extract

Identify materials and components whose unit weights are needed for structural load calculations and apply the applicable provisions.

Related Standards / Relationships

IS 875 Part 2 for imposed loads; IS 875 Part 3 for wind loads; other parts as applicable.
