

DUMMY PROCUREMENT TENDER

Procurement of LED Street Lighting Luminaires

Tender Reference: DUMMY/LED/2026/001
Issuing Department: Municipal Infrastructure Department
Procurement Category: Outdoor LED Street Lighting

1. Scope of Procurement

The department intends to procure LED-based street lighting luminaires for installation on urban roads, public streets and connecting roadways. The luminaires will be installed outdoors and are expected to operate continuously under varying environmental conditions.

2. Product Requirements

Parameter	Requirement
Product	LED street lighting luminaire
Application	Outdoor road and street lighting
Light Source	LED-based lighting system
Installation	Roadside poles and public street infrastructure
Environment	Outdoor operation under varying weather conditions
Operation	Suitable for continuous night-time operation
Construction	Robust construction suitable for outdoor use
Electrical Safety	Applicable electrical safety requirements
Performance	Suitable illumination for roadway applications
Photometric Characteristics	Suitable for road and street lighting
Marking	Appropriate identification and technical marking
Testing	Applicable performance and safety tests

3. Technical and Safety Requirements

The supplied luminaires shall be designed for safe outdoor operation. The product shall satisfy applicable requirements concerning construction, electrical safety, LED performance, photometric characteristics, marking and testing. The design shall be suitable for installation on roadway lighting infrastructure and shall provide reliable operation in outdoor conditions.

4. Compliance with Indian Standards

The bidder shall identify applicable Indian Standards relevant to the supplied LED luminaires and their intended road and street lighting application. The procurement authority will verify the applicability and current status of the standards before finalizing the technical evaluation.

5. Testing and Documentation

The supplier shall provide relevant technical datasheets, product specifications, test reports and compliance documentation. Testing shall cover applicable safety, performance and photometric requirements.

6. Environmental Suitability

The luminaires shall be appropriate for outdoor installation and capable of operating under exposure to normal outdoor environmental conditions, including temperature variation, moisture and dust.

7. Bidder Submission

Bidders shall submit product technical specifications, applicable test reports, manufacturer documentation and details of relevant Indian Standards used for design, manufacturing and testing of the proposed luminaires.

8. Evaluation

Technical evaluation will consider suitability for outdoor road and street lighting, compliance with safety and performance requirements, testing documentation, and conformity with relevant Indian Standards.

Note: This is a dummy tender document created for testing the AI-based BIS standards recommendation system. It is not an official government tender.
